

Setting up STATCO formulas

To pull in statistical amounts from your STATCO accounts:

- Step 1:** On the Setup tab, set **Are you using a Statistical Company?** to Yes
- Step 2:** Enter the ID of your Statistical Company in the corresponding yellow cell

Are you using a Statistical Company?	
ID of your Statistical Company	

- Step 3:** On the Controls tab, enter the GL formula for each statistic you want to pull in into the corresponding yellow cell

Business Segment Name		
Hospice		
Business Segment Type		Segment Style
Hospice		Hospice
Statistics	Patient-Days	ALOS
	Patients Served	MLOS
Direct Service Labor	Visits	Visit-Hours
RN		
LPN		
HHA/CNA		
SW		
Spiritual Care		
Physician/NP		
On-Call		
Admissions		
Bereavement		
Volunteer		
Totals	0	0

The basic format of the F9 formula to use is: =GL("Account",Period,STATCO,MAYear)

Notes:

- Period**, **STATCO**, and **MAYear** are named cells within the MA. Type these words as shown and the MA will automatically recognize what is entered in the cell.
- The only thing that changes from cell to cell is the "Account" section
- You must put quotation marks around the "Account" section
- You may use an asterisk (*) in any segment when a specific number is not needed

Examples:

- To pull stats for a single location:
=GL("4-60-9010-*",Period,STATCO,MAYear)
- To pull total stats for multiple locations with consecutive location numbers, use "." between the starting and ending number for that segment of the account number:
=GL("4..6-60-9010-*",Period,STATCO,MAYear)
- To pull total stats for multiple locations with nonconsecutive numbers, use a comma between numbers for that segment of the account number:
=GL("4,8,10-60-9010-*",Period,STATCO,MAYear)
